

Covid-19 Update

As the pandemic continues to challenge our daily lives, we are working hard to make sure that we can “serve your needs.” Never is this truer than today.

I want to assure all of you, our customers, that our manufacturing facilities have been operating well during this pandemic. Even during this challenging time, our team was able to set several production and sales records across our various facilities for DEF, Anhydrous Ammonia, UAN solution and agricultural grade ammonium nitrate in the first quarter. In addition, even with all of the safety protocols that we implemented due to the pandemic, we’ve had zero recordable incidents at our manufacturing facilities so far this year.

Every day that passes is another day closer to the end of this pandemic and I look forward to the day we can get out and embrace family members, friends, employees and customers.

We will continue to communicate developments concerning our business and operations during the weeks ahead, so you can plan accordingly. We thank you for your business and look forward to continuing to serve you.

Sincerely,

Mark Behrman
Chief Executive Officer
